MENORCA

ABOUT US

It is in 1979, in the mediterranean island of Menorca, that the family company KOSMA was founded by José Luis Trujillo, who pursues his dream: the creation of genuine shoes.

KOSMA launches his first collection handcrafted in a boudoir of the family farm property.

After several years of experience, the company develops and specializes in high-end home leather slippers made by local artisans.

KOSMA

MENORCA

Today, thanks to this legacy, our company evolves and produces shoes crafted with passion in an artisanal and innovative way.

In KOSMA, all our footwear is manufactured with carefully selected genuine leather in order to offer comfortable and modern shoes.

Our philosophy imagines a future where new technologies progress hand in hand with the traditional craftsmanship.

MENORCA

SUSTAINABILITY

Our brand is based entirely on an ideology of sustainability as the foundation of our understanding of production and never from a trend point of view.

We create timeless pieces by hand and do not follow short-term trends. We carefully select the lasts to be able to reuse them for several seasons and we promote the care of our materials so that your shoes last for many years.
